Home: Armii Krajowej 110, 74-100 Gryfino (Poland)

ABOUT ME

PROJECTS:

RamenSwap: I built a frontend for a website that is a decentralized token exchange. The project was done by a team of three.

Technologies used: React, Typescript, Redux Toolkit, Sass, Bootstrap, Git, Vite, React Router, Axios, Portals API, React Icons, Wagmi, Ethers.

[Check it out live](#)

gnNews: Website done for recruitment. You can fetch the news from newsapi, change language, change the news layout, check news details, check out the time, and see a list of current visible articles.

Technologies used: React, Typescript, Redux Toolkit, Sass, Bootstrap, Git, Vite, React Router, Axios, API, React Icons, i18next

[Check it out](#) - can't host it because of CORS - I'd really love it if you check it out

Starbucks Clone: The website is done for the purpose of testing my CSS skills. I copied Starbucks' design and remade it on my website.

Technologies used: HTML, CSS

More of my projects are available on my [Github](#) or portfolio [website](#).

COMMERCIAL EXPERIENCE:

Internship: 06.2022 - 08.2022 - I was building a frontend for a Quiz App. Sadly the project was cut short, however, I learned a lot.

Technologies used: React, Typescript, Storybook, Git, React Router, Axios, API, React Icons

Web Developer at 180heartbeats + JUNG v. MATT: 11.2022 - now - I was building websites in Neos CMS, however, I learned how to work in a team.

Technologies used: Neos CMS, Jira, Docker, GitHub

EDUCATION:

IT Technical College SCI, Szczecin, Programmer technician - 2019 - now
